The reports by the doctor of the jail and by Lieut. Goodman, who cooperated materially in the work in that institution, are attached hereto as Exhibits Nos. 16 and 17. It will be noted that 92 per cent of the women in this institution had gonorrhea and 54 per cent had syphilis, 12 per cent of which had active syphilitic lesions which could be dia osed clinically. Because of the slibrt time the Mayaguez hospital was in operation, it has been impossible to obtain a separate medical report. In San Juan during the months that the hospital has been in existence 218 women have been under observation and treatment. The report of the doctor in charge (Ex. No. 18) states that although 15 women had contagious lesions and 62 were four plus Wassermann positive, at the present time there is not one case...
