This item is printed on demand - Print on Demand Neuware - Master's Thesis from the year 2014 in the subject Computer Science - Applied, grade: A-, , course: Master of Applied Science in Information Systems Management, language: English, abstract: The aim of this study was to determine the status of the United Arab Emirates' Open Government Data usability within the mobile application development. This was done by reviewing the usability factors to develop a mobile application and assess the OGD datasets. An assessment instrument was designed by the researcher based on the reviewed usability factors, to assess the UAE OGD datasets. From the study it was clear that major factors in mobile application development usability by OGD are data completeness, data format and support for developers by offering Application Programming Interface (API) and guides, majority of datasets were found to be complete an indication that UAE OGD has a strong point in data completeness. However, the current UAE OGD does not encourage the developers to build mobile applications because lack of data format support and missing of API and guides. Guidelines to improve the current UAE OGD have...
