REPRESENTATION AND STRUCTURE IN ECONOMICS: THE METHODOLOGY OF ECONOMETRIC MODELS OF THE CONSUMPTION FUNCTION (PAPERBACK)

DOWNLOAD

Taylor Francis Ltd, United Kingdom, 2014. Paperback. Book Condition: New. 233 x 157 mm. Language: English . Brand New Book ***** Print on Demand *****.This book provides a methodological perspective on understanding the essential roles of econometric models in the theory and practice. Offering a comprehensive and comparative exposition of the accounts of models in both econometrics and philosophy of science, this work shows how econometrics and philosophy of science are interconnected while exploring the methodological insight of econometric modelling that can be added to modern philosophical thought. The notion of structure is thoroughly discussed throughout the book. The studies of the consumption function of Trygve Haavelmo, Richard Stone, Milton Friedman, David Hendry and Robert Lucas are taken as the case studies to investigate their methodological implications of model and structure. In addition to the semantic view of the scientific theories, various philosophical accounts concerning scientific models are used to shed light on the methodological nature of these consumption studies in economics. This book will be of great interest to scholars and students of methodology of economics and econometrics as well as anyone interested in the philosophy of science in an economic context.
