Not illustrated. 1908 edition. Excerpt: .beginning their development as a small black spot situated near the apex, but we find it more in the neighbourhood of the crest than of the apex of the tentillum. This shows probably that the tentillum is not a full-grown one. The bourrelet de nematocystes in Bedot's Erenna Richardi is the proximal part of the granulated crest, which does not stand in connection with the entodermal canal of the middle-part. In our largest tentillum we find it on the contrary near the basal part; near the peduncle of the tentillum. Perhaps such another bourrelet is being developed in later stages. Microscopical sections have been made but the material is unfortunately absolutely insufficient, the different layers being all destroyed. We can therefore give no further description of the very interesting entodermal canals and paired organs which Bedot describes, nor of the cellules transparentes and...

### Reviews

*I just started off reading this article pdf. It is probably the most remarkable ebook we have go through. It is extremely difficult to leave it before concluding, once you begin to read the book.*
